

Chris Reichart

Chris Reichart has more than years of experience in technology with a focus on mobile innovation and data collection. Reichart is a global innovation leader working with organizations across four continents.

Reichart started his career working with Macromedia (acquired by Adobe) and IBM before joining various startups. He served as chief business officer at Zerion Software, and co-creator of the iForm app and iFormBuilder mobile platform. While at Zerion, Reichart led sales, marketing, business development, and strategic partnerships, growing the Zerion team from two to 40 employees with customers in more than 110 countries and partnerships with many of the Fortune 500.

Reichart most recently served as the senior vice president of innovation and technology at Elwyn, a non-profit human services organization with more than 6,000 employees. As vice president of innovation and technology, Chris was responsible for the digital transformation of the 167-year-old organization supporting services and teams in nine states.

Reichart is currently the CEO and founder of DelveIn, creating innovative solutions for the human services industry, with a focus on digital case management. Reichart has an undergraduate degree from Johns Hopkins University and a master's degree in Instructional Technology from Bloomsburg University.
